PROFESSIONAL SUMMARY

Second-year Computer Engineering student and Junior Full Stack Developer with practical experience in web application development using React, JavaScript, Node.js, Express, and MySQL.

EXPERIENCE

INDEPENDENT PROJECT | IN DEVELOPMENT

DEVELOPMENT OF A FULL STACK ADMIN PANEL FOR MANAGING PRODUCTS AND OPERATIONS OF AN ONLINE STORE

- Developed the admin interface using React and Vite.
- Built a backend API using Node.js and Express.
- Integrated the application with a MySQL database.
- Implemented CRUD operations for product management.
- Implemented product search and category filtering.
- Developed application routes using React Router.
- Implemented authentication and session management.
- Used HttpOnly cookies and tokens for session management.
- Implemented user registration with email verification codes.
- Implemented expiration for sessions and verification codes.
- Implemented product image upload and management.
- Added Skeleton Loading states for improved user experience.
- Developed reusable components and integrated the frontend, backend, and database.
- Used Git and GitHub for version control.
